NYLON PACKAGING
PRODUCTION

PLASTİK ÜRETİM TESİSİ

2010 yılından beri DÖRTLER Mobilya Malzeme San. Tic. Ltd. Şti ; 4PLASTİK AMBALAJ markasıyla Ambalaj naylonu üretimi yapmaktadır. Rulo ve torba olmak üzere baskılı baskısız Shrink, Balonlu ve Sandeвиç naylon üretimi yapan firmamız aylık 500 ton üretim kapasitesine sahiptir. Perfore Makinalarımız ile min. 20 cm. – max. 235 cm. Genişliğinde ambalaj naylonu perforesi yapılmaktadır. Altı renge kadar baskı yapabilen otomatik baskı izleme sistemine sahip olan matbaa makinamız baskı kalitesinin devamlılığını sağlamaktadır.

NYLON PRODUCTION

2010 DORTLER Mobilya Malzeme San. Tic. Ltd. Sti. Started to produce Packaging Nylon with the brand name 4PLASTIC AMBALAJ. Our company has monthly 500 tons of production capacity in rolls or packages, printed or not printed shrink, normal, bubble and other nylon products. With our Roll machine with Perforator we are able to perforate Packaging nylons min. 20 cm. up to max. 235 cm. With the availability of our 6 colors printing machine, we are able to service the customer as per their requirements. Since our first day, it is our mission to present the most suitable product for the needs of our customers with the highest quality and lowest cost.

- 3 Katlı naylon üretimi
- İç dış yüzey farklı renk olasılığı
- İç yüzey kaygan dış yüzey kaymaz
- Her çeşit laminasyon uygulanabilmektedir
- 3 layer production
- Inner and outer surface in different colors
- Inner surface slippery outer surface rough
- All kinds of limantion can be applied

Application	Use for sofa & furniture back or seat, Trampoline

Furniture Webbing

Furniture Webbing is used mainly in the furniture industry. It is used as support in the seat and back areas of sofas. Furniture webbing is made from rubber threads and polypropylene yarn and comes in the different widths and elongation to meet customer requirements.

The advantages of webbing over springs are in terms of costs and ease of installation. The stretch or elongation aspects of our webbing range from around 10% to 100% and the widths available are up to 70 mm. For back areas of sofas, higher elongation webbing are used (from 90% to 100%) while for seat areas, the lower stretch webbing (from 10% to 80%) are used. The trend is towards wider width webbing (from 60mm to 70mm) instead of the 50mm. This is mainly due to seating comfort and wider widths mean lesser material used.
